Business Description

4(a) Describe the nature of your business and principal products and/or services. Attach additional sheets if necessary.

The Project to be undertaken by Applicant consists of: (a) the acquisition of a leasehold interest in an approximately two (2) acre vacant parcel of land on the St. Luke's Hospital Campus located at 1656 Champlan Avenue, Utica, New York and various distribution easements; (b) the construction on the Land of a certain approximately 5,400 square foot building (the "Facility"); (c) the installation within the Facility of a certain 3.6 mw combined heat and power equipment and all other related equipment (the "Equipment"); (d) the construction of various distribution pipes and conduits on private lands and the easements for the benefit of the St. Luke's Hospital, Inc., St. Luke's Nursing Home and Utica College and (e) financing costs of the foregoing (collectively, the "Project").

Part II: Project Information

5(a) Explain your project in detail. This description should include explanation of all activities which will occur due to this project. Attach additional sheets if necessary.

The Project, as defined in Section 4(a) herein will provide electric energy to St. Luke's Hospital, St. Luke's Nursing Home, and Utica College. The waste heat produced from the engine generators exhaust will be transmitted and used by St. Luke's Hospital.

The CHP plant will consist of (3) 1100 kW and (1) 334 kW natural gas fired lean burn reciprocating engines that produce electricy and steam.

Reasons for Project

6(a) Please explain in detail why you want to undertake this project.

The major objectives and benefits to our three customers from the Burrstone CHP plant are as follows:

- The Project will result in electric costs savings to St. Luke's Hospital, St. Luke's Nursing Home and Utica College which facilities deliver critical community services.
- The Project will produce steam that will reduce the operating costs at St. Luke's Hospital.
- The Project will reduce substantial risk to St. Luke's Hospital, St. Luke's Nursing Home and Utica College of delivery services with National Grid power grid and distribution facilities.
- The Project will result in infrastructure improvements to the Hospital whose boilers are circa 1950, and Utica College will receive an upgrade to the electric distribution systems that are forty (40) years old.
- The Project will reduce green house gas emissions from current service.
- Reduced electrical demand on the National Grid distribution system in the Utica area.

6(b) Why are you requesting the involvement of the Agency in your project?

To obtain sales tax abatement on the purchase of building materials, and distribution equipment that is not exempt from sales tax. A portion of the Project consisting of the electric generation equipment is exempt from tax pursuant to §1115(a) (12) of the New York State Tax Law.

Applicant is also requesting Mortgage Recording Tax Exemption.

Applicant is also requesting a Payment in Lieu of Tax Agreement ("PILOT") in the amount of a full value of \$600,000 for the Facility only.

6(c)	How will the Applicant's plans be affected if Agency approval is not granted?
	This will result in a project cost increase of roughly \$800,000 which will be passed on to the customers in the form of higher energy costs. In addition, the PILOT Agreement benefits will be based to St. Luke's Hospital, Inc., St. Luke's Nursing Home and Utica College who will not pay taxes based on the equipment value.

NOTE: If there is a tax-exempt financing of all or a portion of the project cost, there is a neutral cost/benefit because of lower interest rates by reason of exclusion of interest from gross income of bondholders for purposes of Federal and State income taxes. Taxable financing carries the same cost/benefit for State Income Tax purposes. Such cost/benefits cannot be quantified.
